

P.S. PUBLISHING SERVICES

ADDING VALUE TO PUBLISHERS' CONTENT

P.S. Publishing Services has been established by *The Charlesworth Group* in the UK to meet an identified need in the publishing market from peer review to final print and online deliverables.

We can add value to content by managing a full package of publishing services, enabling publishers to focus on their core activities. Publishers can pick and mix from our range of services or opt for a fully managed package: UK or offshore outsourcing.

A snapshot of what we do:

- Specialised copy-editing
- Translation
- Rewriting
- Marketing
- Subscription management
- Typesetting
- Printing
- Distribution
- Warehousing
- Bespoke full project management

We recognise that not all papers for publication require the same level of attention and so we can offer a range of solutions, for example UK or offshore copy-editing. Rates reflect the level of work required.

A rewriting service for papers submitted by non-native English speakers is another speciality. The rewriting is carried out by experts in the field - engineering, medicine, and social sciences, among others.

From Albanian to Zulu, *The Charlesworth Group* can provide translation of more than 150 languages, done by native speaking professional linguists resident in that country. However, should there be commercial or sensitive reasons for not doing so, the translation can be carried out in the UK or the USA depending on the publisher's location.
